SUMMARY

Full Stack Developer building web applications with JavaScript/TypeScript, React, Node.js and Python/Django — CRUD applications, REST APIs and responsive interfaces, deployed to production on Render and Vercel. Career changer with a decade of experience managing clinical data in an intensive care unit, where accuracy and traceability were non-negotiable; brings that same discipline to code and data. Advanced English (C1) and working hours that overlap the full US business day and European afternoons.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Frontend: React, Component-Based Architecture, Responsive Web Design
Backend: Node.js, Express.js, Django, REST APIs, CRUD Operations
Databases: MongoDB, MySQL, Oracle
Tools & Deployment: Git, GitHub, Postman, Render, Vercel, HubSpot

PROJECTS

ELD Trip Planner

github.com/matii1942

[Python](#) · [Django](#) · [JavaScript](#) · [CSS](#) · [REST API](#) · [Render](#) · [Vercel](#)

- Built a full-stack trip planner that calculates truck routes across the U.S. and schedules driving time, rest breaks and fuel stops according to FMCSA Hours of Service rules.
- Developed a Django backend that handles the route and compliance calculations and exposes them through a REST API consumed by a responsive JavaScript frontend.
- Deployed the Django API on Render and the frontend on Vercel, connecting both services in production.

E-Commerce Web Application

github.com/matii1942/ecommerce

[JavaScript](#) · [React](#) · [Node.js](#) · [MongoDB](#) · [CSS](#) · [Render](#)

- Developed a storefront featuring product listing, cart functionality and dynamic data handling from the backend.
- Applied component-based architecture and responsive design principles across every view; deployed live on Render.

Task Manager Application

github.com/matii1942

[React](#) · [TypeScript](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#)

- Built a full-stack task management application with complete CRUD functionality, backed by a REST API and MongoDB persistence.
- Developed reusable, responsive React components in TypeScript, handling form validation, application state and API errors.

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer — Law Firm (client project)

2026 – Present

- Designed and developed a website for a law firm, giving prospective clients a clear way to find and contact a lawyer.
- Built an intake flow where visitors describe their type of case or claim before being matched with the right lawyer.
- Handled confidential client information with care, limiting what is collected and keeping it accessible only to the firm.

Data Management & Functional Support — Clínica Espora, ICU

Feb 2014 – 2025

- Maintained and organised clinical data and database-related workflows for an intensive care unit.
- Supported traceability, digital documentation and information-quality processes relied on daily by medical staff.
- Contributed to process improvements in a high-responsibility environment where data accuracy is critical.

Digital Operations Assistant & Web Maintenance — Invid Computers

May 2019 – 2021

- Updated website content, product listings and promotional material across the company's digital platforms.
- Ran publishing, maintenance and reporting workflows for ongoing digital operations.
- Improved operational accuracy through consistent content and data updates.

EDUCATION

- Systems Analysis — ISFT N° 172 (in progress)
- Full Stack Web Development — UTN
- Professional Nurse (prior career)

LANGUAGES

- Spanish — Native
- English — Advanced (C1)
